I had this opportunity to learn about “Longevityology”, from a good friend of mine involved in a serious car accident. When I was informed by the hospital to visit my friend in the emergency room, I saw my friend using the hand less injured, trembling and wrote “Longevityology”, wanted me to contact teacher Choy immediately, requested them to come to the hospital, hoping it would alleviate her pain and to prevent her condition from getting worse. My friend was hospitalised for 80 days, it gratified me to see everyday at least one volunteer would come to apply adjustments for my friend. Even the medical doctors were surprised to see the way my friend’s response to the healing, treatment and progress was made ahead of expected time. At the same time, I learned the existence of such good organisation – being selflessness, helping and giving, not expecting rewards or anything in return for the good deeds. These interest and prompt me with the intention to learn “Longevityology”.

Came to know there would be primary and intermediate courses being held in the month of August in Taipei, and curiously wanting to experience for any changes after chakras opening. Having completed the primary course, mother complained her throat and her head are not felling well, so, I placed my hands alternately on C7, C6, C5 and the heart region, adjustments applied over one hour, then mother said the feeling of unwell reduced a lot. First time practice with good result, my confidence level doubled. Therefore, with my devotion and grateful heart, I completed the intermediate course. By the time my good friend was able to leave hospital for convalescent at home, I tried to apply adjustments for her, when I placed my hand on the wounded area and C7, immediately I could feel the tingling sensation like electricity passing through my hands, then I realised deeply the explanations and reasons given by the teacher. Because my friend’s body is weak,
