In my whole life, “Longevity” is my precious ability forever, and so is the unforgettable universal energy. One situation deeply seated in my memory was my son had a fall downstairs from second floor to first floor; his head was bleeding non-stop, white tissue paper turned into red tissue paper. At that time, all family members were so scared and afraid, I put my left hand on C7, the right hand on the bleeding wound, on the way to the hospital, the bleeding stopped, and I felt a bit better then. I believe there is a saying of, so much work and efforts you put into it, even a golden stone would split open.

It happened in 2007, in the city, two university students involved in a car accident, the passers-by did not give a helping hand, and I went and said to this good-looking student, told him not to be afraid, I would use Longevity to help him. While I was applying adjustments, I noticed that he was slowly relaxing and showing gratitude through his eye expressions. Longevity can save life can help those who need help, it is good for myself and good for him, it's too good to compare!

It happened before in my work place, when this little boy was having the hair cut, could not sit still, moving a lot and very active, accidentally the scissors nipped his ear, I got very scared, immediately I placed one hand on C7 and the hand on the wound site., A few minutes later, I found the blood is clotted. While I was applying adjustments, my whole body relaxed, my hands felt hot like heat waves flowing.

When I apply adjustments to myself, very often, it feels like that small amount of electric waves flowing through the body, it feels wonderful.

Symptoms and adjustments: Head injury – C7 + affected areas.
