In mid March 2008, I had a medical check-up and discovered a blood vessel tumour in the liver, the doctor said it is not serious, not to worry too much, but I was very anxious. Then came April, a friend of mine recommended me to learn Longevityology, the teacher said any kind of tumour, you place one hand on C7, the other hand on the affected area, the condition would improve, or even healed. From that day every night before sleep and any time I am free, my hand never leave where the liver situated, self adjustments continued till 17 July for another check-up, the doctor said he could not find the tumour, naturally I was very happy. Told my friend about this matter, it is surprising to achieve such good result through self-adjustments of Longevityology. Then one day I went to the other hospital to collect medicines for my mother, I sought the opinion from another specialist of my condition. The reply I got from this specialist was – impossible, so I went back to the doctor and requested for an advance scanning, the result was – the tumour could not be found, it must be the effect of

Longevityology, made the tumour disappeared.

During this period whenever I am cooking, frying vegetables or barbecuing, very often I burn myself, every time I immediately apply adjustments, very soon I would not feel the pain, no swelling, no blister forming. Certainly, during this period I apply adjustments for my friends and relatives when needed. I found that for chronic conditions, you have to be patient, for new problems very effective, so for people with chronic problems, I would advise them to be patient with the adjustments, and suggest them to take the courses of Longevityology. As long as they would participate or feeling the effects of adjustment, I would be very happy, because I am able to do one good deed every day! I am very grateful to my friend who introduced me to Longevityology.

Symptoms and adjustments : Blood vessel tumour – C7 + affected area.

Burns – C7 + affected areas.
