I am a cancer sufferer, after 3 courses of chemotherapy, had the uterus ovaries removed, then had another 3 courses of chemotherapy, still did not find the cause. Had some side effects from chemotherapy, numbness and tingling sensation in my hands and feet, had blood checked, the tumour marker increased each time.

After the chakras opened, did not have specific feeling in the beginning, when doing exercise, could not concentrate, felt very tired, until the intermediate course completed, gradually my concentration improved. I have abdominal distension every day, on the 5<sup>th</sup> day of the course, started to pass flatus, that day at least passed 50 times, felt so comfortable! During the course, my right finger was inflamed, I placed on hand on C5, the other hand on the affected finger, it got better after 3 days, wonderful.

When I apply adjustments to people, my body feels hot, sweating, the person being adjusted felt some movements in the affected area. It happened once, I was applying adjustments on this person's kidneys area, when I got home that night, I felt pain in my loin area, then I applied adjustments on myself for a few days, and I felt better.

I am grateful to teacher Wei, teacher Lin and Mr.Choy, and the opportunity to learn Longevityology, to me it is a good thing, having learned Longevityology, to do self-healing, as well as healing others. Also very grateful to all the volunteer workers for their enthusiasms in teaching and guiding me. Thank you!

Symptoms and adjustments : Cancer – C7 + C2 + affected areas.  
Nail infection – C5 + nail affected.
