My breast cancer was in second stage, had the operation in February 2006, till now, its obvious my body have been showing discomfort because I had 25 lymphatic glands removed from the left side, always feel numbness in the left arm. The first time receiving Longevityology adjustments, my arm felt so hot that made me wanted to push away the person who was giving me the treatment. Just as well, teacher Lin was sitting next to me and said, this is because the cells have been activated. It is a wonderful feeling, 20 minutes after the adjustments, I was able to sit for 3 hours without feeling the numbness of the left arm, and it is great! Primary and intermediate courses completed, continued to apply adjustments myself, the sensation in my left arm getting better and better.

In the centre, when I apply adjustments to people, have numb feelings in my fingers, like jumping movement. When I am being treated, it feels like pins and needles, hot and burning.

Having learned Longevityology, it is like having a good doctor by my side, I feel lucky. When I am applying adjustments to people, and see that individual appears relaxed, it is a happy feeling, thank you for the Longevityology.

Symptoms and adjustments : Breast cancer – C7 + C5 + affected areas.
