

my dry eyes condition got better without medications, very thankful to “Longevity”, thankful to Yau grandpa and all the volunteers.

Life is full of obstacles, an even more unfortunate event happened. In January 1997, while having a bath, unintentionally noticed right under arm felt a hard lump, without delay went to all the major hospitals for consultation, i.e. Chung Shan Hospital, Sun Yet Shan Cancer Prevention Centre, Kung Po etc, all said it could be cancer, needed to have a specimen section for examination. Just at that time, a brother of my husband (not blood-related) Hau Headmaster knew about it, he said this is not a small matter, need to find a good doctor to do more test. On 23rd March, he himself drove the car, took me and two of my sons to Taichung General Hospital, requested Dr Liu Registrar of Surgical Department to examine me, immediately performed an aspiration procedure, 20 minutes afterward, announced that it could be cancer, and required a section specimen for detail examination. In fact I knew nothing about Dr.Liu, only knew that he's Headmaster Hau's good friend. Immediately I requested Dr.Liu to do the dissection examination. Dr Liu also acted quickly, straight away took me to the operation room for the procedure, and got the result after one week. On 31st March went to Taichung again, it has been confirmed that it was lymph node cancer. At that time, I was not scared, went with my children and had a big meal in Taichung before heading back to Taipei.

On 1st April went to Taipei General Hospital Tumour Department for consultation, Registrar Dr. Chan, he himself examined me, I have been told that Registrar Dr. Chan has been recognised as no.1 or no.2 one of the best doctor in Taiwan Strait of 12 million people. That day completed all the investigations i.e. lumbar puncture (for spinal fluid), computerised scanning, x-ray, blood test etc, and confirmed that a tumour of 5 cm behind the bladder was cancerous. Followed immediately on 5th April commenced the first course of chemotherapy, until 29th May, had three courses of chemotherapy. Each time for 4 days and 3 nights, each time had three injections of chemotherapy. The other patients in the hospital receiving chemotherapy, nearly everyone suffered from nausea and vomiting, hair starting to fall out, it seems I was not ill at all, had no other symptoms, able to eat, to sleep, able to climb mountain, able to dance. Because of “Longevity” a big help to me, ever since I accepted Longevity, never been stopped, every day I have over 1 hour adjustments applied, while in the hospital having treatment. Much appreciated to all the volunteers come to the hospital and helped me with adjustments, such as one of the founder Mr. Lin the senior, Miss Cheng senior, Yau grandpa, all the volunteers of the General Hospital, Tucheng treatment centre, with my sincere thanks to you all.

Since April, May 1997 had three courses of chemotherapy, until 30th December 1998, one and a half years; every week had to go to General Hospital for
