

Severe headaches did not recur after chakras opened.

Learner : Ms. Wong

Address : Taipei County, Panchiao city.

Tel: +886-2-29532802

The reason I learned Longevityology was to help my husband, who suffered from eyesight problems, was infected from an illness, leading to blood poisoning and collapsed with multi-organs failure, also lost his eyesight. For half of this year, we have been searching for specialist in all the hospitals from north to south, but one time after another repeatedly disappointed. After long-term hospitalisation and treatment, we were exhausted. To me, this period, everyday is a new kind of challenge and testing; I did not know what else to do? Is there anyone can help me, heavens!

Perhaps heaven has heard my prayer, showed me a “clear road”, a pleasant encounter with Longevityology. During one trip with my husband back to south of the country for consultation, one of the relative recommended and enthusiastically searching for information about Longevityology on the internet. Went back to Taipei, the first thing I did was to phone and enquire about the courses of Longevityology. I remember someone said: “when the heaven closed one door on you, it would also open a window for you” Thanks to Longevityology bring us thread of hope, I deeply believe my husband’s eye would be able to see the heaven and day light again.

I remembered the first time applied adjustments to my husband, one hand on C7, one hand on the eyes, after 5 minutes, his body started to shake involuntary, and half an hour later the shaking stopped. The volunteer explained that because of his chi and blood not circulating smoothly, but once he absorbs more energy, naturally he would be better.

To think back the first day of the lesson, that day my headaches reappeared, the pain was so bad it felt like the head was going to split open, after the chakras opened, one hand on C7, one hand on C6, the original pain slowly changed to hot, fully expanded and heaviness. Returned to my seat, do not know in what time, have forgotten the pain in the head, which was so severe as if it was going to explode. After that until now, it did not recur, this was an amazing experience.

Teacher Lin always says you need to have confidence in yourself; I should
