At one time, I was ill, woke up one day, in front of my eyes, it was all darkness, could not see anything, I was extremely frightened and thought: am I dreaming! Good heavens, do not play joke with me, really is not a laughing matter, and kept asking, Why me? At least hundred thousand times, during this period, because of my family members been non-stop comforting and encouraging me, and the care of the social workers emotionally and spiritually supporting me, gradually stabilised.

It might have been heaven took pity on me, or heard my begging, guiding me through to the bright road, to have met Longevityology fatefully. The family brought me to the south of the country for consultation, through the relatives' enthusiasm and introduced me to Longevityology.

Do not think of anything, just extend both hands would be ok. From the lessons I attended and family members' talking, news, came to know pf where the chakras situated in the body, and how to apply adjustments to people, I did not know I can do a lot of things, also able to help people, it seems suddenly all the brightness in front of my eyes.

Few days ago, the third sister-in-law came to the house, unfortunately bitten by a dog. She was bleeding a lot, rushed her to the hospital. On the way back, I remembered teacher Lin taught us one on C7, one hand on affected area, would be able to reduce a bit of pain. After that, adjustments applied for a few days, result as expected, the wound healed speedily, did not suffer more pain, so wonderful. While applying adjustments, my hands feel expanded, hot and prickly, the third sister-in-law also felt hot and numbness in the area. I thought to myself: I really can do it, this make my confidence increased 100 times.

The second sister-in-law has been suffering from insomnia and headaches, because of my difficulties, invited her to my house and applied adjustments for her. When it first started, one hand on C7, one hand on C6, after 5 minutes, she started to yell that her head was very painful, going to split open, I kept comforting her: this is a good sign, keep up and relax. Another 30 minutes passed, I asked her in a low voice, better now? A faint reply came to my ears: more comfortable, no pain.
