

Longevity helped mother who had a stroke.

Learner : Ms. Chan

Address : Taipei city, Chungshan district.

Tel: +886-968288996

Since I was small, I have cold hands and cold feet, for the past couple of years going through menopause. This year summer very often go out at noon, no properly prepared for the sun, the neck and hands got red and swollen from the sunburn, feel very itchy. After the chakras opened from primary and intermediate courses, apart from self-adjustments, also went to the volunteer centre for healing, now all the ills and pains improved.

After the chakras opened, did not have any reaction, but as the teacher said, it is correct just to extend your hands. In the end of June, mother had a brain stem thrombosis leading to stroke, on 17th August (the intermediate course completed), mother was in high dependence ward, her condition was unfavourable, chesty with a lot of sputum, my husband and I together applied adjustments to chakras C7 and 6, lungs and heart. Then on 23rd August, both of us travelled south and applied adjustments for her, on 25th August, got a message from my sister, mother is breathing better, heart beat improved, less chesty and sputum aspirated (everyday needed to be aspirated twice), up to now still in a coma, but making progress. I think this is my motive of learning Longevity, and mother's good fortune!

At home I would apply adjustments for my son, he thinks Longevity is unbelievable, I would with my patience, happy heart, extend my both hands. With believe determination, patience, and compassion with care and extend both hands, I believe we would witness miracle. In addition, in the volunteer centre, having meet and know all the volunteers, it is a huge good fortune!

Symptoms and adjustments : Stroke – the whole head and the inactive areas of the body.
