

Mother had a stroke, energised fully and able to speak.

Learner : Mr. Kwok

Address : Taipei County Taishan Hon

Tel: +886-2-29019878

My mother was seriously ill, had a stroke, and has diabetes and abnormal heart rate. Been in the hospital since 3rd April until now. Before applying adjustments she was so weak, has no energy to speak, the white of eyes turned yellow. After learning Longevityology, every day go to work, doing exercise (Buddhist chanting), then to the hospital to help mother with the adjustments, for a month non-stop. Each time at least take 3 hours, sometimes longer. In the beginning, mother could not bear my hands placed on C7 and all other areas, as soon as I place my hands down, she would say uncomfortable, it pressurized me so much. Had to wait until she is asleep, then start adjustments, But now, when I place my hands on her head, she does not reject, feels the warmth very comfortable. Her paralysed left hand and leg was not able to move is getting some reaction, feels numb and hot, the white of the eyes getting back to normal, feels more energised and able to speak, making progress well.

With my hearty gratefulness, I wish with my energy, to help more those who needed help.

Symptoms and adjustments : Stroke, all the chakras, all organs and affected areas.
