The company I am working for is to do with keeping wellness and cosmetic business, all along been paying attention to look after the body, so my health condition has been good. When having chakras 2 and 3 opened, felt a strong energy entered the body, when standing up felt a bit faint, back to my seat, put my hands on my heart area and sitting quietly, the feeling of faint gradually disappeared. In intermediate course had chakras 5 and 4 opened, as soon as they opened, immediately felt like going to toilet, then felt faint again while having chakras 2 and 3 opened, and felt a bit pain in the area, after 2 – 3 minutes, that feeling disappeared.

After the primary course completed, been helping and applying adjustments to father's grey fingernails problem, which he had for a long time. Father also has hypertensive retinopathy (already had an operation), high blood pressure problems. It is a bit awkward when applying adjustments because he has to lie down on his side, can only place my hand on his left palm for half an hour, for three consecutive days, father said to me, when applying adjustments, very clearly he could feel the blood circulating in the chest, his grey finger nails stopped getting worse.

Helped a colleague who has sinusitis, applied adjustments to C7 and nose, in less than 5 minutes, he was feeling sleepy; continued adjustments for 20 minutes, did not hear any noise from the colleague or his breathing noise; adjustments completed. The colleague felt so tired and slept for 10 minutes, he felt much better, and he was breathing much more easily. I have been searching for natural healing therapy, also hoping to help people with their health, at the same not giving myself too much responsibility. Understanding Longevity, and actually helped people with adjustments, I feel it is great, helping people and helping self.

Symptoms and adjustments : Grey finger nails – C3 + liver + finger nails.

Hypertensive retinopathy – C7 + C3 + eyes.

Hypertension – C4 + heart.

Sinusitis – C7 + C5 + nose.
