

Nasal congestion unblocked at last.

Learner : Ms. Lui

Address : Taipei County, Shilin city.

Tel: +886-2-89701385

All along, my health has been good. The last few years, my nose having nasal allergy, tried various methods to improve it, but unable to get rid off the root problem. With luck, I joined the Longevity courses, the first day, had the chakras opened and went home, applied adjustments to my nose, very surprised and because I have not felt so good for a long time, I could breathe easily in and out through the nose, no blockage feeling. After the intermediate course completed, continued with the adjustments, after adjustments would feel very comfortable, so I am very grateful to Longevity, made my blocked nose improved.

The first time applying adjustments for someone, both hands, especially between fingers have numb and hot feelings, after several adjustments, this numb feeling has gone, but still feels slightly hot, no other reaction appeared. I am pleased that this shows my bodily health is still good. From now on, I dared not to careless and light-hearted; also have to keep doing exercises, to help more people, keeping my own body well and healthy.

Very grateful to the teachers, all the volunteers, given the chance to know about Longevity, learning such important power and it's ability to save people, forever helping people. I hope I would be able to be on the same level as the volunteers' selflessness service to others.

Symptoms and adjustments : Sinusitis – C7 + C5 + nose.
