Tomorrow would be a better day. As I keep this belief going and supporting me to look forward to future. If not, with this body full of illnesses, I do not have much hope in my future life. Now, because of my working environment, had the opportunity to meet this honourable couple – teacher Lin and teacher Wei, and were exposed to Longevityology.

Having attended the classes and had the chakras opened through the primary and intermediate courses, every learners were able to guide the universal energy with their hands and apply adjustments for people. Normally I do not believe in anything evil, my sense told me – is it this wonderful? I have spinal problem, if my sitting position not correct, then the pain would be unbearable, after several adjustments from the volunteers, it got better with out medications. Privately I asked teacher Wei, for the beginner who has ailments, how one should apply adjustments, within half month's time, the problem of secretion running back down the throat instead of out, this condition improved. Another sister, each time she has a flu and would lead to pus oozing from the ear, I placed one hand on C7, one hand on the ear; or one hand on C5 and one hand on the ear, adjustments applied for 2 weeks consecutively, this sister felt her ear is much drier, no more pus coming out from the ear. All these prove clearly, made my doubts all vanished; deeply feel the abilities of both hands, human abilities always win!

Since joined Longevityology, having seen all the volunteers, their love of selflessness, without blames, without regrets, their continuous giving and offering of service, made me so moved. I lived past half a hundred, I always thought the means of living with people, as long as I do nothing bad and everything would be ok in my heart. Not knowing this whole life, due to lack of love and tolerance, should not have lived all that life. With respect to the wonders of Longevityology, I would do my utmost best to prosper Longevityology, and keep it companied for life.

Symptoms and adjustments : Disc – C7 + affected areas.

Nasal discharge – C7 + nose. Pussy ear – C7 + ear.
