It was my wife's soft and tough approach made me to accept Longevityology reluctantly, because all along I was doubtful of its effectiveness. After the primary course and intermediate courses, two events happened, that changed my view totally towards its' effectiveness, my mind and heart deeply believe in it. After the course completed, one day, in the middle of the night 3:50 am, woke up and had to go to toilet, then I felt the left eye very uncomfortable. I was thinking it is not daytime or outside, it could not be sand/dust got into the eye, so I looked in the mirror, could not see anything, could not think of what else to do, but try it. Applied adjustments to me, approximately 40 minutes later, and miracle happened, the feeling of uncomfortable has gone, back to normal. The happy feeling inside my heart was difficult to describe, also very surprised, the effectiveness of Longevityology is so wonderful.

My other problem was snoring, but how severe it was I am not sure, it is only from my wife's unwillingness to sleep in the same room, so I could imagine. According to my wife: every night she gets up to the bathroom, she could hear me snoring. After learning Longevityology, one night she got up, did not hear me snoring, she got panic, thought I have stopped breathing. She came into the room to check on me, saw me sleeping soundly, breathing normally, then she felt like the stone has been put down from her heart, then she jokingly said: been hearing your snoring from the past 30 odd years, now I could not hear it, I would have to get used to it!

After these two events and experiences, I am glad that I the opportunity joining Longevityology, and hopefully after attending the advance course, not only able to make body healthier, also hoping to help people to get rid off ills and pains, everyone would be able to lead a happy healthy life.

Symptoms and adjustments : Snoring – C7 + nose.

Sand/dust in eye – C7 + eye.
