

After chakras opened – uric acid level reduced.

Learner : Mr. Chan

Address : Taipei County, Tucheng city.

Tel: +886-2-22653106

My main ills and pains which is gout that I had for many years, the uric acid level has been maintained between 8 – 9 (average person's normal range is 6 – 7). In addition, I felt this is a troublesome illness, for so many years my diet has been rather simple, not able to eat food with high purine content, when it flares up, need to take medications or injection to control.

In mid August through a friend's invitation and joined Longevityology held at Man Sang District Activity Centre. After the chakras opened, did not have much reaction, then in the end of August I was riding a bicycle, felt and injured left hand, got infected and swollen, went to the hospital and had blood test done. Apart from white blood cells increased, the rest were normal. I was surprised that the uric acid level has come to within normal limits, although close to seven, it is the lowest for many years, it may be the best proof of having learned Longevityology!

Lately been going to Tucheng treatment centre to receive adjustments from centre master Lui for the swollen and painful left arm, after 2 days, the swelling has gone. I am helping my wife with adjustments for her stomach problem, there has been some improvements after a few days, deeply believe that only continued with adjustments, it would be healed one day.

No matter it is "learning" Longevityology, or it is "using" Longevityology, as long as there is a kind wish in the heart, good with both hands, save self and save people, and able to proof that "both hands are multifunctional".

Symptoms and adjustments : Gout – C7 + C3 + affected area.
