

opened her eyes and said: "ah, it is done, go and drink a glass of water, your liver is not so good, need to rests, do not get too tired!" Very surprised and said "Thank you, Ma ma! This Longevityology is so amazing! Can I learn it?" My lovely mother-in-law said: "Of course! I would inform you when teacher Wei starts primary course next time."

On 13th March 2008, I joined the intermediate course. In the hall, my mother-in-law and sister-in-law already are volunteers of the advance class wearing the Longevityology waistcoat; applying adjustments to people, they do not know. Seeing them happily helping people with adjustments, at the same time explaining in detail about the chakras in the body. I wish one day I can be like them, serving people, also very thankful to teacher Wei passing on the kung fu of Longevityology to us. Grateful to my mother-in-law, and lead me into Longevityology, able to serve people.

Symptoms and adjustments : Hepatitis B – C7 + C3 + liver.
