I have been suffering from regular headaches from very young age, and have a weak and frail body, because of that, a friend of my mother encouraged her to learn Longevityology. After she experienced the effectiveness herself, suggested me to go and learn, therefore, I joined the primary and intermediate courses of Longevityology this year.

After I had the chakras opened in the primary course, whether is a long or short time, everyday I find time to doing exercises. The problem with my headaches it might be due to accumulation over the years, and everyday there is new pressure appearing, with self adjustments the effect did not make me better, but, when my hand place on the pain area, it actually could reduce the pain. Incidentally, our cat at home recently has been ill, took her to the vet. Because she is fierce-looking cat, can get very violent, not able to receive treatment from the doctor, so, just have to take her back home and think of something else. Because we did not know what was wrong with the cat, so, I and mother together we applied adjustments to the cat. Two adults' hands easily covered the cat's whole body, able to treat all the chakras at once, very quickly the cat recovered, and her muscles also seems firmer, myself and mother felt so happy. Apart from that , the cat would be travelling to Shanghai' with the original owner, mother especially reminded me to apply adjustments to the cat's head, to settle her heart and mind, so she could face her fore coming journey safely.

With this successful experience, I with my "evil hands" extended to the fish in the house, this fish is already 10 years old, and a few months ago, her companion left this world. Since then she is not eating well and no as active as before, when I placed my hands closed to the fish tank, could feel prickly sensation. Continued for the adjustments for a few days, still getting the prickly hot feeling, I hope the fish will recover with the help of Longevityology.

Because of these successful experiences, I have every confidence to recommend my friend and colleagues to learn Longevityology. Hope all my friends and myself would be healthy and beautiful together, especially my colleague who
