

## **A patient with colon cancer work as a volunteer.**

**Learner : Mr. Hung**

**Address : Taipei County, Hsintein**

**Tel: +886-2-89146178**

In April 2008, after learning Longevityology, very conscientiously applying adjustments for my father (who is 85 years old). In August 2007, he had been passing blood in his stools, he had rectal-endoscope examination, it revealed that he had rectal cancer; the tumour was about 2-3 cm.

Because of my father's old age, worried that he might not be able to withstand the operation, decided to treat him with Chinese medicine and Longevityology. Father feels ok, although not much improvement and no worsening of his condition observed. With the encouragement from me and other people, so in June 2008, father participated and learned Longevityology of the primary and intermediate courses in Panchiao activity centre. Every day he does self-healing, meditation, and 3 times a week he does voluntary work at the centre. It is good to see him happy in doing what he loves to do, and in my heart is even happier. Months ago, he wanted to enrol to take part in advance course and hope to help more people.

Symptoms and adjustments : Colon cancer – C7 +C3 + C2 + affected area.
